

# Are you or your eligible family members taking a high cost drug\*?

Your benefit plan has a new program – Specialty Drug Care

Manulife's Specialty Drug Care program offers savings on high cost drugs and the support of a nurse case manager for individuals taking medications to treat a complex, chronic or life threatening conditions such as: rheumatoid arthritis; Crohn's disease; multiple sclerosis (MS); pulmonary arterial hypertension (PAH); cancer; osteoporosis and hepatitis C.

Manulife developed this program in partnership with Bayshore HealthCare Ltd., one of the largest private healthcare providers in Canada, with a network of over 11,000 health care professionals nationwide and expertise in specialty drug management.

When you have a new prescription for drugs, included in the program, you will be contacted directly by a nurse case manager to introduce you to the program. The nurse case manager is there to help make arrangements for you to get your medication and to help you manage your condition.

You are welcome to join the program and take advantage of the savings and the additional support of the nurse case manager.

\*usually more than \$600 per month
